Designing Leadership in Textile Industry with High Quality & High Speed Textile Printing

ColorJet Group - the wide-format digital textile print technology leader, welcomes you to the world of limitless design possibilities.

The company was founded in 1995 and has since been known for its industry-leading performance. It is one of the top global exporters of wide-format printers and provides world-class fabric printing solutions. ColorJet's digital textile machines are revolutionizing the world of textile printing with their robust performance, lowest downtime, high value addition and quick ROI.

ColorJet Group offers comprehensive solutions from Pre to Post catering to meet the requirements of fabric processing houses, printing mills, export houses, and new investors who want to kick start their digital textile printing project foreseeing the fast fashion trends & abrupt reduction of the supply chain. Our experienced team of professionals is here to recommend and give the total plan of the digital printing project irrespective of the type of fibre (cotton, polyester, nylon, silk, wool), type of inks (reactive, disperse, sublimation, pigment, acid), type of applications (fashion apparels including formal wear, ethnic wear, swimwear, sports wear, home textile, technical textile and many others), size of business or any other customization as provided by the customer.

With over 6,000 installations across more than 50 countries, ColorJet has cemented its position as a global leader in the digital printing industry. This extensive reach and commitment to innovation empower ColorJet to compete with the best in the field, driving advancements and setting new standards in quality and efficiency.

Maintaining its leadership position through its globally reputed deep commitment to Technological Innovation, Strong Outreach & Service Infrastructure, and Complete Customer Focus, the high-productivity machines by ColorJet are designed to meet today's challenges and handle tomorrow's textile production requirements.

1

India's largest manufacturer of large format digital printers

2

R&D department recognised by Ministry of Science & Technology, Govt. of India

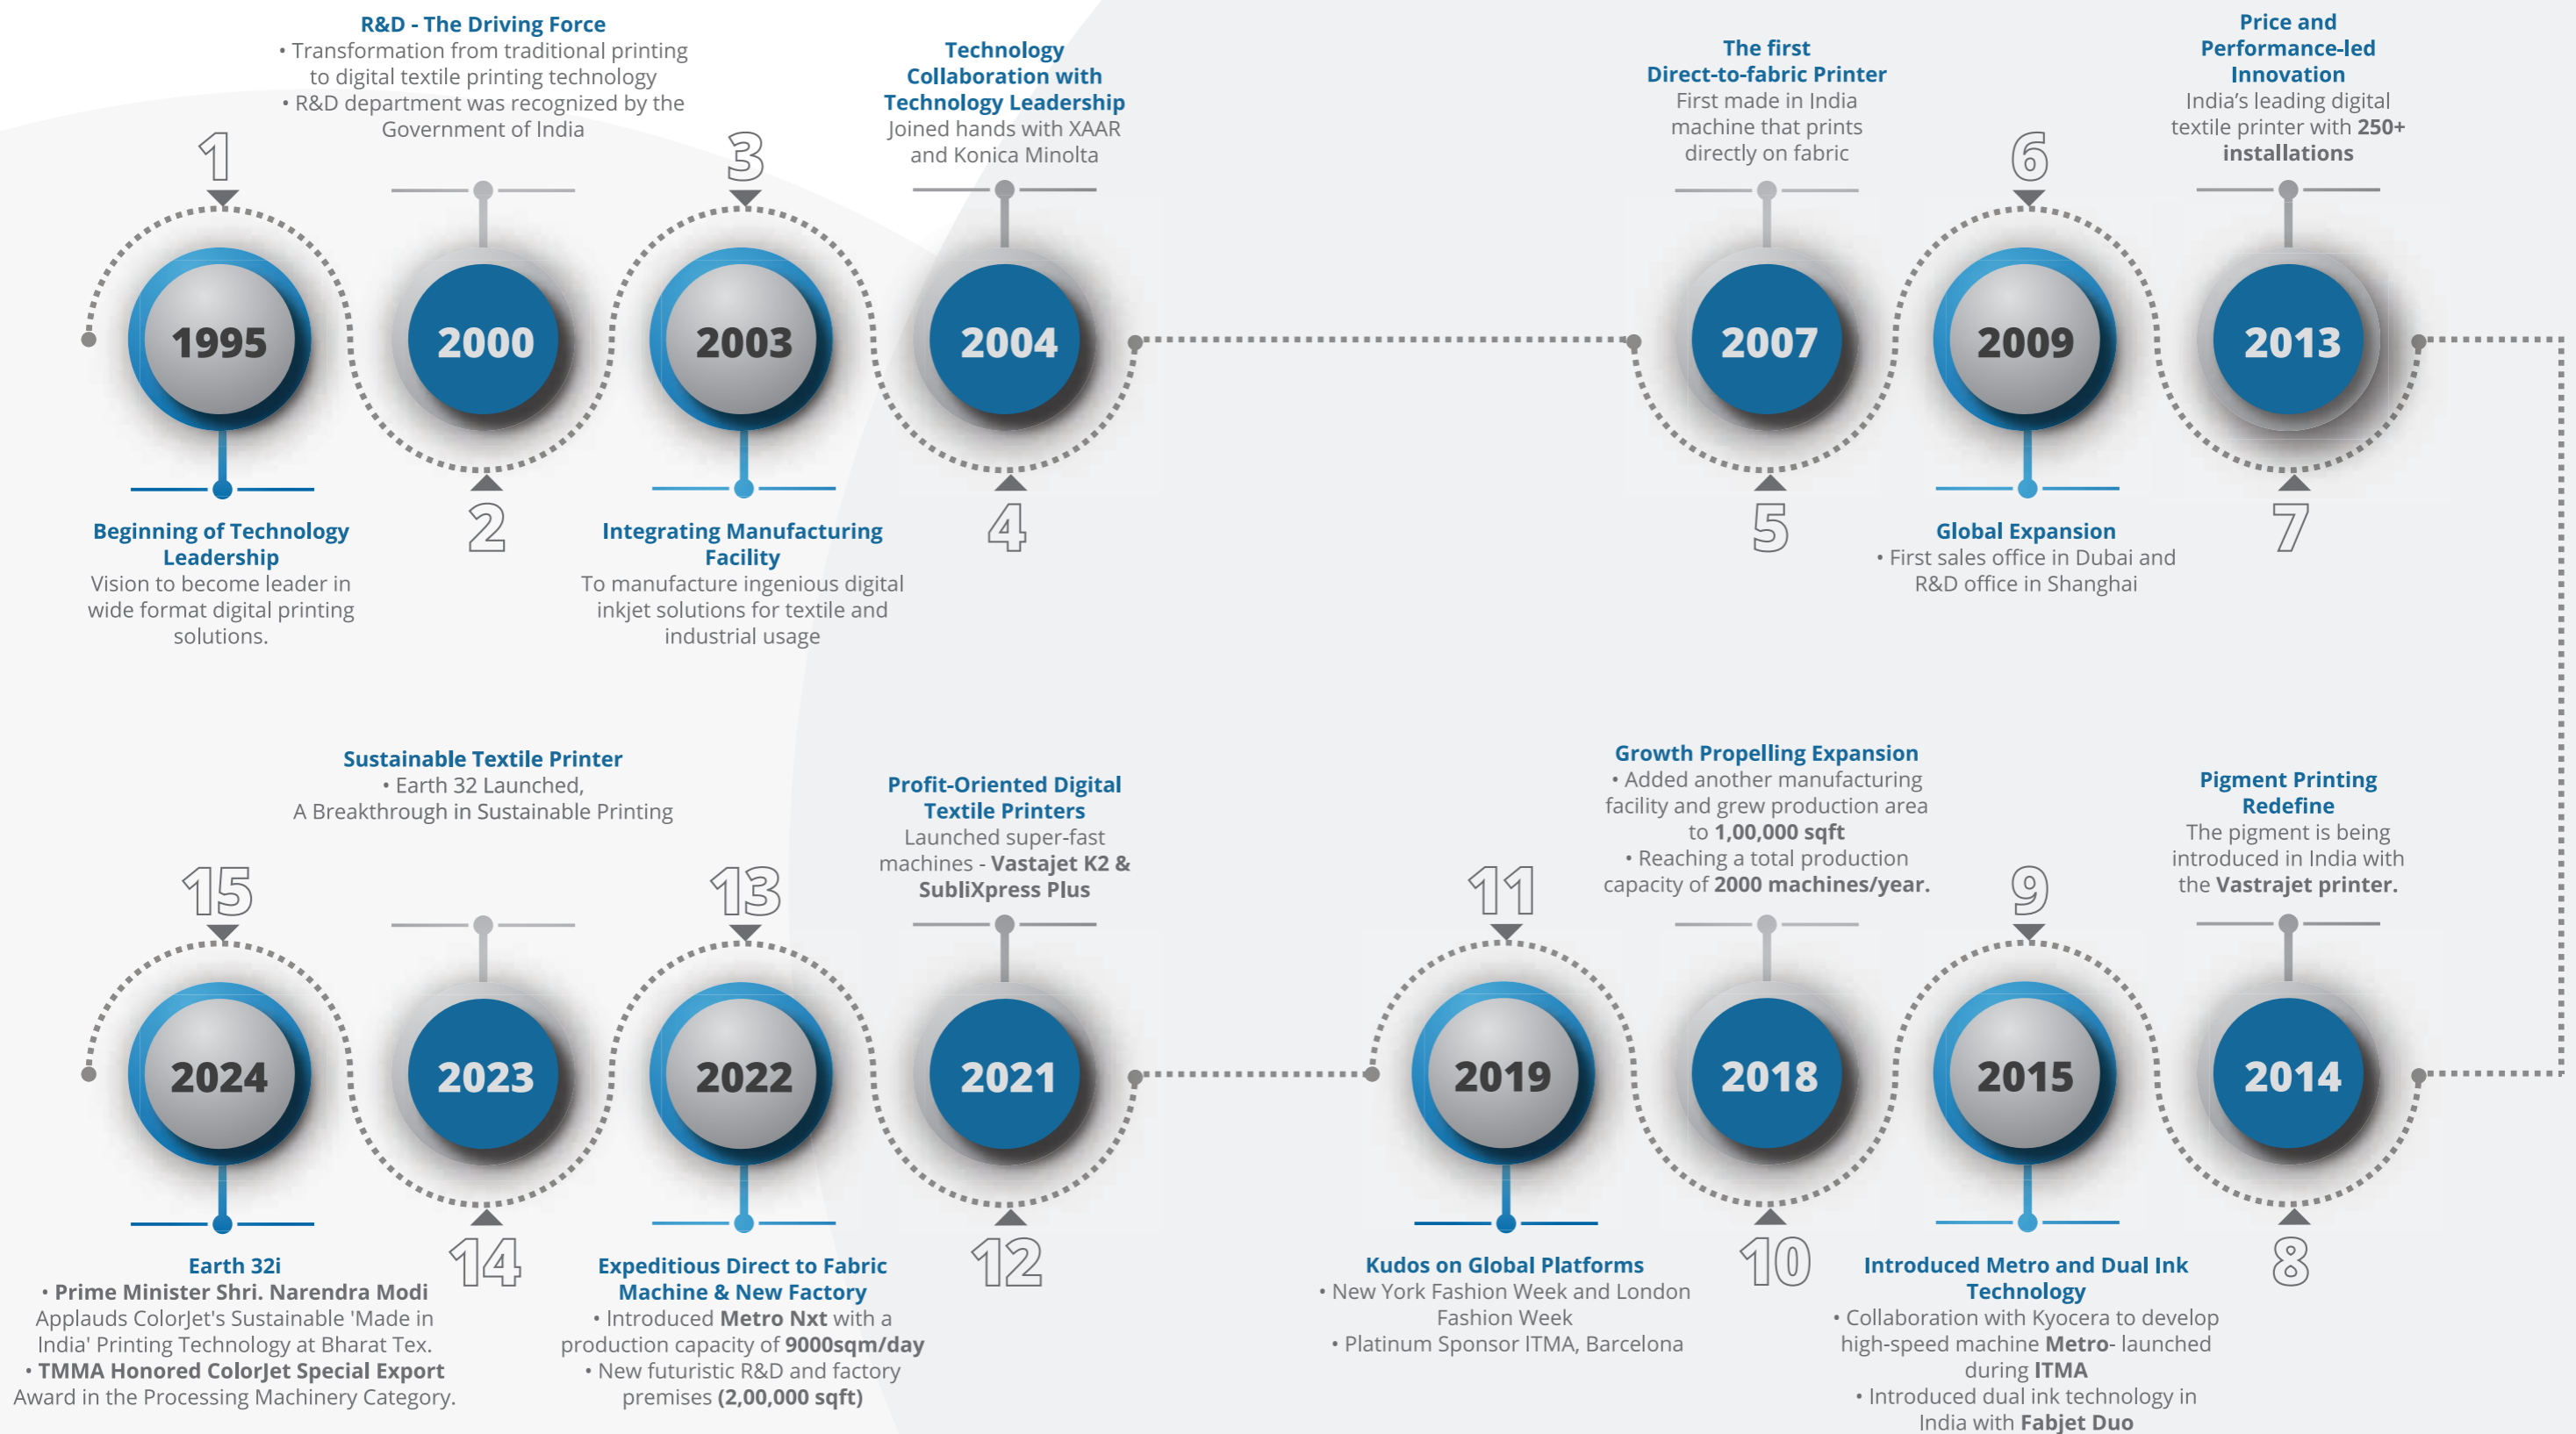

3

30 yrs of experience in wide format digital textile print technology

4

Offering complete solution from pre to post in digital textile printing process

TIMELINE OF SUCCESS

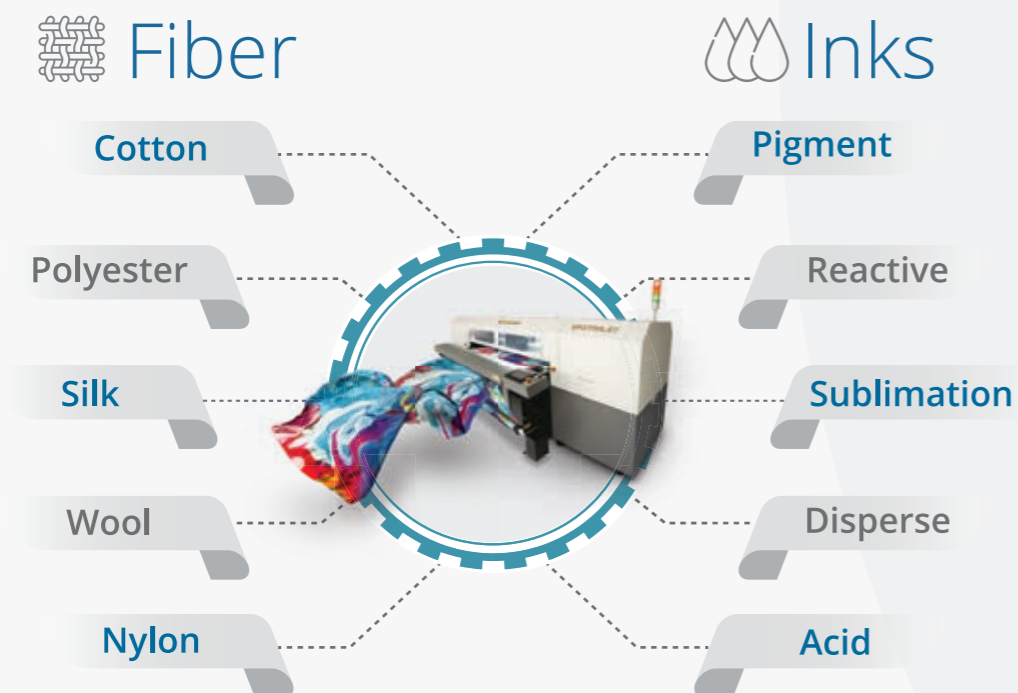

ColorJet Offers Complete Solution from Pre to Post Treatment in Digital Printing Workflow

ColorJet offers hassle free textile printing process from Multi Chamber Stenter for Chemical Padding, Digital Printer, Star Ager / Loop Ager for proper Steaming & Curing, Print Washing Range to get the washing done on printed fabric, Hydro Extractor for water removal & Vertical Cylinder Dryers for final drying.

Multiple Digital Textile Printing - Versatile solutions across all printing needs

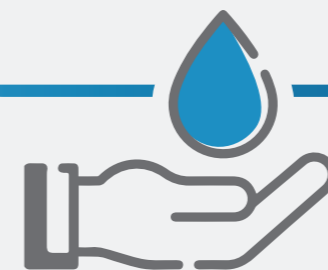

ColorJet Textile Printing Solution Is More Conscious Towards The Environment

The ColorJet textile printing process enables truly sustainable and responsible textile printing process with minimal water consumption and water pollution

Minimal water consumption

We always try to make intelligent use of natural resources without compromising the quality.

Sustainable Printing

We believe in eco-sustainable manufacturing that ensures low chemical emissions.

EARTH 32i

With a Production Capacity of up to 6000 sqm/day

A revolutionary digital textile printing solution that seamlessly blends cutting-edge technology with industrial precision. Seamlessly integrated with 32 advanced 6 PL Konica Minolta Print heads and a new design, it sets up a new benchmark for clarity and precision in eco-friendly digital textile printing. The Earth 32i's polymerization process at 160 degrees after printing ensures excellent colour fastness, and enduring print quality.

FEATURES

EFFICIENT INK SUPPLY SYSTEM:
Sufficient ink supply to prevent ink starvation while printing at high-speed

HEAD CRASH PROTECTIVE SYSTEM:
To help protect the head from any obstruction during carriage movement

LINEAR MOTOR:
For precise ink jetting at high speeds & smooth carriage movement

GOLD PLATED METAL ENCODER:
More precise ink jetting even at high speeds results in precision printing

MODULAR FEEDING SYSTEM:
To incorporate large size rolls for continuous printing

ON DEMAND CAPPING & WIPING SYSTEM USING HMI SCREEN:
To keep inks from drying in the print head & remove debris

5 STAGES WATER EFFICIENT FABRIC HANDLING TREATMENT:
For easy belt wash & Jet cleaning, with no blockage due to lint or dust

CONTROLLED AIRFLOW WHILE PRINTING
Any kind of forced Airflow can result in uneven jetting or cross firing of water based inks

AIVC® TECH
ColorJet Waveform ensure that the jetting adapts to the viscosity of the inks

HIGHER MECHANICAL PRECISION
The Earth 32i achieves higher levels of mechanical precision compared to its predecessors

EFFICIENT TENSION CONTROLLER SYSTEM
The machine is equipped with a system of precise OsciPlus™ precise rollers

CONTINUOUS INK CIRCULATION SYSTEM
Provides constant & uniform temperature across the print head

DRYER UNIT
The dryer unit, offers customizable temperature control

THE EARTH SERIES: A FUSION OF SUSTAINABILITY & PERFORMANCE

- **Maximizing Performance with Turbocharged Nozzle Pumping** - Attain larger drop sizes and increased depth while maintaining optimal speed. Turbocharged design ensures efficiency for superior performance without compromising productivity.
- **Superfine Nano Nozzles** - Enhanced sharpness through superfine drop size using Nano nozzles. Achieve precise details and vibrant colors, optimizing print quality for intricate designs and high-resolution images, ensuring exceptional results.
- **Variable Drop Printing Option** - Multidrop to Variable drop printing option help in achieving more accurate color tones along with smoother colour Gradiance.
- **Enhanced Fabric Feeding Efficiency** - New rollers ensure wrinkle-free feeding with proper fabric tension. Three adjustable gear mechanisms control tension across spreader, banana, and tensioner rollers. Option for Osci+™ precise spiral spreader rotator for hosiery printing.
- **Optimized And Enhanced Safety Standards** - A safety rope sensor and emergency staff switch have been added for enhanced safety during operations, along with four emergency switches. Eye bolts allow for easy machine lifting via hoist.

Specially Designed & Engineered to deliver Exceptional Design Advantage

Precision with Power.
EARTH 32i

METRO NXT

1.8 Mtr Direct To Fabric Printer

With a Massive Production Capacity of 9000 sqm/day

Our latest high-performance machine, the **METRO NXT**, has a great production capability of up to 9,000 sqm/day, considerably reducing the pressure associated with long industrial production runs in a short time.

It comes with upto 32 Industrial Grade Kyocera Print Heads and delivers sharp quality output using ColorJet recommended inks available in the configuration of 8 Colors options.

GREAT FEATURES

EFFICIENT INK SUPPLY SYSTEM:
Sufficient ink supply to prevent ink starvation while printing at high-speed

HEAD CRASH PROTECTIVE SYSTEM:
To help protect the head from any obstruction during carriage movement

LINEAR MOTOR:
For precise ink jetting at high speeds & smooth carriage movement

Micron Precision Encoder
It helps increase accuracy in aligning carriage and belt movement.

MODULAR FEEDING SYSTEM:
To incorporate large size rolls for continuous printing

ON DEMAND CAPPING & WIPING SYSTEM USING HMI SCREEN:
To keep inks from drying in the print head & remove debris

5 STAGES WATER EFFICIENT FABRIC HANDLING TREATMENT:
For easy belt wash & Jet cleaning, with no blockage due to lint or dust

ADVANCED PRINTING TECHNOLOGIES

Osci+™

Osci plus™ oscillating pressure rollers for efficient tension control & smooth fabric feeding, regardless of fabric parameters such as gsm, weave, crimp, elasticity, & skewness.

Purge+™

An ink-saving device that facilitates the removal of air bubbles by recirculating the ink into the circuit.

Reach New Levels of Productivity Every Day with the Great Performer Metro Nxt

**Accessories shown along with the printer are not part of standard equipment. However, these can be available at the customer's demand only.*

INDEPENDENT DRYER + PLAITER UNIT

Advanced independent **Drying System** for large speed production. Incorporated with efficient roll winding system controlled by gear motor, which controls the fabric tension.

**We have multiple dryer options, which are optional and are provided as per customer requirement.*

Faster, Reliable & Perfect Fit for Industrial Production

THE SWIFTNES OF
METRO NXT

VASTRAJET K2 PRO[®]

With an Impressive speed of up to 450 sqm/hr.

The Vastrajet K2 Pro is designed to meet the demands of modern textile printing, combining advanced digital technology with industrial-grade performance. Featuring 48 Industrial Grade Konica Minolta Print Heads with High Quality print using ColorJet Original inks, this machine delivers unparalleled precision and clarity in every print.

FEATURES

Enhanced Jetting – optimised nozzle capability:

Advanced jetting assembly optimisation in the Vastrajet K2 Pro ensures precise and reliable printing performance. This includes features such as optimized print head firing, and improved nozzle performance mechanisms.

Variable drop printing option – Multidrop to Variable drop printing option help is achieving more accurate colour tones along with smoother colour Gradience.

Improved Safety standards optimised – In addition to the four emergency safety switches, safety rope sensor has been added to provide enhanced safety during operations.

Optimized Fabric Pinching Process – A new array of rollers will ensure wrinkle free feeding with proper fabric tension across the width of the fabric.

New ergonomic designs for ease of use and maintenance: The Vastrajet K2 Pro is built with all new ergonomic design cabinet that has the maximum accessibility to all critical components for the easy maintenance and cleaning. Machine handling during loading, unloading & installation made highly flexible with accessibility to both fork lift and hoist.

ADDITIONAL FEATURES

Higher mechanical precision

Modular Feeding System

Equipped with up to 48 Heads

Efficient ink supply system

Controlled Airflow while Printing

Efficient Tension Controller System

AIVC[®] Tech

On demand Capping and Wiping System using HMI screen

Works With Diverse
Inks & Fabrics!

Master Every Challenge
VASTRAJET K2 PRO

VASTRAJET® K2

1.8 Mtr Direct To Fabric Printer

With a Massive Production Capacity of 6100 sqm/day

Our digital fabric printer **Vastrajet K2** is a great combination of high speed and high quality.

It is one of the best printing solution for businesses that want to experiment with different patterns and make the fabrics appealing with checks, stripes and geometric designs.

The machine delivers magnificent prints using the ColorJet Inks. It is available in the configuration of 32 industrial grade Konica Minolta Print Heads with a production speed of 306 sqm/hour and can seamlessly print 6000 Sqm/day.

EQUIPPED WITH EXCELLENT FEATURES

Efficient Ink Supply System

Sufficient ink supply to prevent ink starvation while printing at high-speed

Linear Motor

Allows precise carriage movement

Micron Precision Encoder

It helps increase accuracy in aligning carriage and belt movement.

5 Stages Water Efficient Fabric Handling Treatment

To ensure perfect and easy cleaning of the belt with improved water jet & zero moisture belt drying mechanism

ADVANCED PRINTING TECHNOLOGIES

Kiloton™

ColorJet introduces new Kiloton™ Technology in **Vastrajet K2**, which significantly extends the print head life

Osci+™

Osci plus™ oscillating pressure rollers for efficient tension control and smooth fabric feeding, regardless of fabric parameters such as gsm, weave, crimp, elasticity, and skewness

Purge+™

An ink-saving device that facilitates the removal of air bubbles by recirculating the ink into the circuit

A World-class Machine that Meets All the Needs of Textile Printing Businesses.

THE EXPERTISE OF
VASTRAJET K2®

VASTRAJET®

1.8 Mtr Direct To Fabric Printer

With a Massive Production Capacity of 3500 sqm/day

VASTRAJET is a workhorse of the fashion industry when it comes to creating unique & vibrant designs.

The machine comes with maximum capabilities and applications for maximum business & can effortlessly print on most elastic or sheer fabrics.

Heavy-duty design with a rigid structure makes the machine suitable for rigorous industrial operating conditions.

PRINT SYSTEM

- With 8/16 Industrial grade jetting assemblies for long service life
- Proprietary AIVC technology for consistent print quality matching samples to production across Vastrajet lines.
- Supports binary and variable drop printing to produce sharp images, vivid colours large gamut and gradations effects
- Capping station and piezoelectric actuators to keep inkjet nozzles always ready & protected when idle.
- Inbuilt humidifier to keep print head protected & ready for best performance.

FABRIC FEED AND TAKE-UP SYSTEM

- Fabric unwinding regulated to keep constant tension from start to finish
- Adhesive conveyor belt ensures fabric flatness and in place for accurate printing and prevent creases in fabric while printing.
- Winding with torque motor for continual unattended printing of fabric rolls

FABRIC HANDLING TREATMENT

- Equipped with water jets and brush roller to wash excess ink and lint
- Super absorbent roller to ensure removal of residual moisture
- Belt dryer ensures that completely dry belt surface is available for fresh fabric feed

INFRARED DRYER

- Compact inbuilt infrared dryer for quick drying of printed ink on fabric
- Uses power efficient radiation for minimal heat dissipation into surroundings

RIP

- Machine comes preloaded with ColorJet edition of the RIP software with advanced colour management engine and colour processing tools
- Fabric specific ICC profile for smooth gradations, vibrant colours for superior print quality

INK SYSTEM

- Quick response pumps to avoid ink starvation during printing
- On the fly ink refill
- 3.9 litre ink tanks for long ink refilling cycles
- Advanced degassing and de-bubbling - removes bubbles that may have formed during ink refills; avoids head blockage during high speed printing
- Inline filters ensures right ink viscosity prevent impurities freeing elements & large particles making perfect print conditions & safe guard print head (or prolong printhead life).

Max Capabilities & Applications for Max Business

THE FLAMBOYANCE
VASTRAJET®

FABJET PRO

Production Capacity of up to 13,000 sqm/day

Introducing the FabJet Pro, our latest leap in digital textile printing innovation. With a remarkable production capacity of up to 13,000 square meters per day, the FabJet Pro redefines speed, quality, and efficiency in the industry. Designed for ultra-wide format direct-to-fabric printing up to 3.2 meters.

Equipped with 32 Kyocera and 48 Konica Minolta Print Heads with a sticky belt system, the FabJet Pro ensures unparalleled precision and clarity in every print. This state-of-the-art machine is engineered to meet the highest demands of productivity while maintaining exceptional quality, making it the perfect choice for forward-thinking textile manufacturers seeking to elevate their production capabilities.

ADVANCE TECHNOLOGY

Sync Optima Enabled

SyncOptima is a groundbreaking digital textile printing technology that sets the standard for precision and efficiency. This advanced system optimizes carriage and belt movement to ensure flawless synchronization across our printing ecosystem. The result is consistently high-quality prints delivered at impressive speeds, meeting the highest industry standards for performance and reliability.

Optimized Fabric Feeding Process

Our upgraded roller system ensures wrinkle-free fabric feeding with consistent tension across the entire width.

Turbocharged Nozzle Pumping

The turbocharged design ensures efficiency, enabling superior performance without sacrificing productivity. Helps to Achieve greater depth and larger drop size while maintaining optimal speed.

Variable Drop Printing

Variable drop printing option helps in achieving more accurate colour tones along with smoother colour gradience.

Improved Safety Standards

A safety rope sensor and emergency staff switch have been added for enhanced safety during operations, along with four emergency switches. Eye bolts allow for easy machine lifting via hoist.

New ergonomic designs for ease of use and maintenance:

The FabJet Pro boasts a new ergonomic cabinet design, maximizing access to critical components for easy maintenance and cleaning.

ADDITIONAL FEATURES

Efficient Ink Supply System

A complete system enabling the smooth running of the ink and providing high printing stability in high industrial production. Peristaltic pumps help keep the ink supply at a constant level. Negative pressure is detected and adjusted continuously to prevent unwanted ink dropping and spilling of the print head. Efficient Ink degassing system to remove air bubbles in ink tubes to avoid ink starvation assuring the highest print quality.

Controlled Airflow while Printing

Any kind of forced Airflow can result in uneven jetting or cross-firing of water-based inks which can ultimately effect the drop placement.

Capping and Wiping System

Automatic Capping system prevents inks from drying within the print head when the printer is not in use & On-demand wiping system effectively removes ink, dust & debris from the print head.

AIVC® Tech

ColorJet Waveform ensures that the jetting adapts to the viscosity of the inks irrespective of the temperature of the inks.

Micron Precision Encoder

It helps increase accuracy in aligning carriage and belt movement.

Efficient Tension Controller System

The machine features OscioPlus™ precise rollers for optimal tension control and seamless fabric feeding, regardless of GSM, weave, crimp, elasticity, or skewness. The tension roller effectively balances uneven tension, ensuring smooth and consistent media movement.

Modular Feeding System

A modular feeding system to incorporate large-size rolls for continuous printing.

Redefines Speed, Quality,
and Efficiency.

FABJET PRO

FABJET GRAND/DUO

3.2 Mtr Direct To Fabric Printer

Great Solutions for Wider Width Applications

FABJET GRAND is the ideal direct-to-fabric printing solution for creating large customised patterns for the home furnishings business. Heavy duty design with rigid structure makes the machine suitable for rigorous shop floor operating conditions.

FABJET-DUO is conceptualised to address the need for a printer that can work with two different inks. The two-in-one printing machine has a dual ink supply system which allows switching between any two types of inks with the flick of a switch. So, now you can use the same machine to print drapes woven with polyester filament yarn or high thread count sheetings woven in cotton yarn, for example.

PRINT SYSTEM

- With 8/16 Industrial grade jetting assemblies for long service life
- Proprietary AIVC technology for consistent print quality even under varying ambient conditions
- Supports binary or variable drop printing to produce sharp images, vivid colours and greyscale effects
- Automatic wiping system which wipes excess ink and lint from the print head surface
- Capping station and piezoelectric actuators to keep inkjet nozzles adequately hydrated when idle

FABRIC FEED AND TAKE-UP SYSTEM

- Fabric roll is mounted on air inflatable shaft
- Fabric feed is through dancing bar and guide rolls to maintain fabric tension from start to finish
- Heavy duty rubber roll with pneumatically loaded press roll pulls and holds the fabric in place for printing
- Front roll moves with the feeding rubber roll for smooth movement of fabric

INFRARED DRYER

- Compact inbuilt infrared dryer for quick drying of printed ink on fabric
- Uses power efficient radiation for minimal dissipation of heat to surroundings

RIP

- Machine comes preloaded with Colorjet edition of the RIP software with advanced colour management engine and colour processing tools
- Fabric specific ICC profile for smooth gradations, vibrant colours for superior print quality

INK SYSTEM

- Quick response pumps to avoid ink starvation during printing
- Low ink warning for operator attention
- On the fly ink refill
- 2.5 litre ink tanks for long ink refilling cycles
- Advanced degassing and de-bubbling avoids head blockage during high speed printing
- Inline filters for keeping out impurities or larger particles from print head
- Block of 4 heads connected to one ink system or the other (For Fabjet Duo Only)

Unbeatable for Both Short-Runs & Mass Production Applications

SPECIFICATIONS

CONFIGURATION			FABJET GRAND			FABJET DUO
			PA4824	PA8824	PA8164	NA4824
Printing Technology			Drop-on-demand, Piezoelectric Inkjet			
No. of Print Heads			8	8	16	8
Print Heads	Type	Industrial Grade Jetting Assemblies				
	Resolution	Upto 1440 DPI				
	Height Adjustment	Upto 10 mm				
	Cleaning	Pressure Purge and Wiping				
	Wetting Control	Piezoelectric Actuators				
Ink	Types	Reactive / Disperse / Pigment / Acid				
	No of colors	4	8	8	4	
	Supply	2.5 Ltr, Bulk ink Supply System with inline degassing				
Fabric	Type	Cotton, Viscose, Polyester, Polyamide, Silk, Wool				
	Max. Thickness	Upto 5 mm				
	Fabric Width Upto	3220 mm			2500 mm	
	Printing Width	Upto 3200 mm			Upto 2500 mm	
	Roll Width	400 mm				
Fabric Drying System			Infrared Heaters			
Operating Interface			Touch Screen			
Printing Interface			High Speed USB			
Rip Software Supported			NeoStampa (Colorjet Edition)			
File Format			JPEG / TIFF / BMP / PDF (RGB / CMYK)			
Power Supply			220 V, 8 KW Single / Three phase load distribution, 50Hz			
Operating Conditions			Temperature: 24°C ± 4 Humidity: 60% ± 5% RH			
Printer Dimension/Net Weight			2100 mm x 5300 mm x 1650 mm (LxWxH) / 2000 kg Approx.

THE VIBRANCE OF
FABJET GRAND™
FABJET DUO

SubliXpress Plus

1.95 Mtr Industrial Sublimation Printer
With a Massive Production
Capacity of 9000 sqm/day

Speed, Quality, Reliability and Consistency are the four most powerful pillars of our most advanced 76" Wide industrial dye sublimation printer - **SubliXpress Plus**. Well equipped with Active Seaming Technology and 8 industrial Kyocera print heads, SubliXpress Plus is also available in 4/6/8 color variant. Furthermore, it has a vast production potential of 9,000 sqm/day to intensify your production level.

FEATURES

1 *INDUSTRIAL LEVEL PRINT HEADS* – Upto 8 heads in two rows with variable drop size technology for attaining sharp quality at high speed

2 *LEAF CLAMPS* – Polished steel clamps placed at either side to prevent paper edges from curling

3 *INK DEGASSING SYSTEM* – To remove bubbles and gas trapped in ink tubes and avoid ink starvation

4 *MULTIPLE BRUSH ROLLERS* – To ensure effective wrinkle-free media feeding and take-up

5 *DANCING ROLLER* – To provide continuous uniform tension and roll alignment for media from feeding to take up

6 *LINEAR MOTOR* – Linear Motor with high precision dual guide rail beam helps improve printing speed and ensure printing accuracy

7 *Micron Precision Encoder*
It helps increase accuracy in aligning carriage and belt movement.

8 *HSTR* – High Sense Paper Tension Regulator. It detects fluctuation in tension and corrects it almost instantly

9 *TWO STAGE DRYING MECHANISM* – To prevent cockling of paper & provide precise ink absorption on the media

10 *AST* – Active Seaming Technology for superior quality at high speed

11 *Z ENCODER* – For precise head height adjustment during calibration

Super Quick Machine that can
Print up to 9,000 Sqm/day
Seamlessly

THE COMPETENCE OF
SubliXpress PLUS

Advanced Printing Technologies

Innovative Digital Textile Printing Technologies introduced by ColorJet for Incomparable Outputs.

The **ColorJet AiS™** lowers the cost of operation and provides the customer flexibility to use ink of its own choice to fulfill multiple purpose.

AiS™ offers specialized ICC profiles in line with new tech specs of new ink technologies

AiS™ provides full support to ensure optimized print performance

AiS™ works to ensure long life of print heads

Digital printers are the business lifeline of print solution providers. This makes the optimal life of the machine's entry and exit across a heavy utilisation and new technology development time-cycle critical. All ColorJet digital printers are designed & engineered through **3D simulation processes** at ColorJet's Innovation Laboratories and built optimally, to deliver phenomenal business value, income and an optimal exit point to customers.

Built from 100% galvanized steel

Highest standard of aluminum and CNC

Built to ensure accuracy of every micron

8 stage preparation process of design, chemical treatment, powder coating and paint

Have functional structures designed & manufactured from aeronautical - grade hard-anodized aluminum

QA processes to ensure error-free performance

Optimal performance from concept to design to prototype to production stages

Xactcolor™ was born after extensive continuous research & Development as a response to the problems that emerged from the market and keep updated in pushing the limits. Irrespective of temperature & humidity, variety of Inks, padding, fabric material & textures, this technology matches the same colour across all printers from the house of ColorJet.

Synchronised print-head and software solution

Variable Drop Technology

The ColorJet R&D team created **XACTCOLOR** to reconcile all usage conditions through printhead, mechanical capability and software technologies to **deliver consistent colour reproduction and detail under all applications and geographies.**

Active Seaming Technology (AST™) for superior quality at high speed.

High Sense Paper Tension Regulator. It detects fluctuation in tension and corrects it almost instantly.

An ink-saving device that facilitates the removal of air bubbles by recirculating the ink into the circuit.

Kiloton™ Technology emerged from the special association of Technology of Konica Minolta with ColorJet to extend the print head life significantly.

Osci plus™ oscillating pressure rollers offer efficient tension control and smooth feeding of the fabric irrespective of its parameter-gsm, weave, crimp, elasticity, skewness, making the machines flexible to be used with any fabric.
